

UV Phototherapy Machine ZPTM-A17

Overview

UV Phototherapy Machine ZPTM-A17 is designed for full-body treatment. This cutting-edge cabin utilizes Philips medical-grade UV lamps to deliver precise and effective therapy. This system allows simultaneous or independent treatments to suit individual needs by offering both PUVA and NBUVB therapies. Our dual monitoring system—both hardware and software—guarantees consistent performance and safety. Ideal for dermatological conditions or other therapeutic uses.

Features:

- Full-Body Phototherapy
- Philips Medical UV Lamps
- Dual Therapy Modes
- Microcomputer Control System
- Hardware & Software Dual Monitoring
- Reflectors on Each Lamp
- Scientific Ventilation Cooling
- Foot Switch
- Remote Nurse Call Function

Applications:

UV Phototherapy Machine ZPTM-A17 combines UVA light and psoralen (a photosensitizing agent) for advanced treatment of severe skin disorders and also provides targeted therapy for specific skin areas with reduced risk of side effects.

Specifications :

Full Body Treatment	Designed for full-body UV phototherapy
UV Lamps	Philips special medical-grade UV lamps
